SUMMER BASELAYER

A COLLECTION DESIGNED TO STAY DRY AND FRESH IN THE SUMMER MONTHS

Accapi means technology, ergonomics and even appeal.
our designers are up-to-date on the latest colours and styles around
the world, and know how to give every garment a glamorous look.
We believe that people are the perfect 'system' for checking and refining
products, and that's why they engage and complete what technology
creates at every stage of the process.

NEMBUS

DRY SKIN

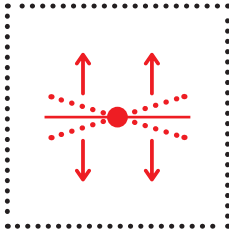

JUST LIKE A CLOUD FULL OF MOISTURE
THAT BECOMES RAIN WHEN IT COMES INTO CONTACT
WITH WARM AIR, THE CLOUD TECHNOLOGY USED
TO CREATE NEMBUS HELPS TO EXPEL BODY HEAT

NEMBUS LIGHT

RELAXED FIT

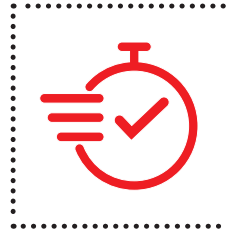

The U-Dry fibre used to make this range has natural surface tension that enables water and sweat to evaporate quickly, dispersing heat and wicking moisture away to keep the skin dry. Its hypoallergenic and anti-odour properties make it especially suitable for sports underwear, with excellent resistance to acidic substances and alkaline sweat, making it comfortable, practical and hygienic, even after strenuous exercise.

Equilibrium technology (EQT) plays its part by increasing the body's postural stability, and reducing the amount of energy used to maintain a static and dynamic upright position.

IMPROVED POSTURAL STABILITY

Considerably increase postural stability during various motor activities

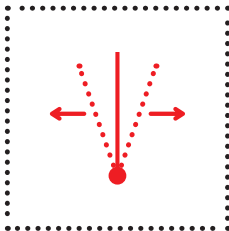

QUICK-DRYING

The use of U-DRY fibre ensures surprisingly quick drying

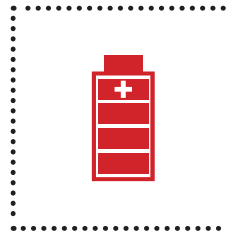

WICKS MOISTURE TO THE OUTSIDE

Channels moisture outside the garment, maintaining skin dry and an optimal temperature

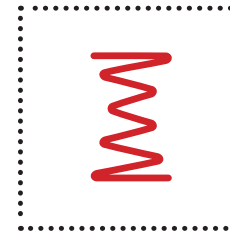

MAINTAINS AN UPRIGHT POSTURE

Shows a quicker and more effective reaction to imbalance

REDUCED ENERGY CONSUMPTION

Reduces actual energy consumption to maintain static and dynamic equilibrium

IMPROVED STRETCHING

Facilitates and improves stretching exercises while making movements extremely fluid

ECOCYCLE

ACCAPI'S SUSTAINABLE CHOICE TO HELP THE PLANET

ECOCYCLE IS 100%
POST-CONSUMER RECYCLED POLYESTER MADE
WITH A HIGHLY SUSTAINABLE PROCESS.
THIS RESPONSIBLE CHOICE SAFEGUARDS
HUMANKIND AND THE ENVIRONMENT

SAFEGUARDING THE ENVIRONMENT

Ecocycle contributes to the reuse of bottles and other plastics that have been recycled. Using recycled polyester over conventional polyester results in:

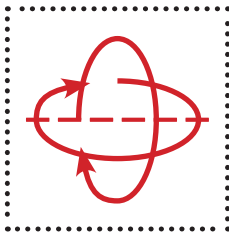

-86% WATER CONSUMPTION

-100% POLLUTANTS DISCHARGED

-51% ENERGY CONSUMPTION

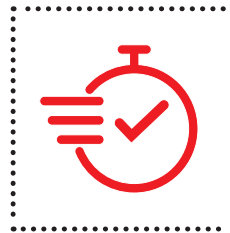

Lower energy and water consumption, and a reduced reliance on oil, illustrate an increasing focus on sustainable development to improve our quality of life. REPETITA is a synthetic textile fibre created using post-consumer recycled plastic bottles, enabling excess plastic on the planet to be repurposed. Most of this plastic ends up in our oceans and, unlike natural and artificial fibres, is not biodegradable. This ecological fibre has been created with a high-quality, Made in Italy manufacturing process. Accapi has chosen REPETITA to make its ECOCYCLE range of T-shirts suitable for all types of outdoor sports and exercise. As light as they are strong, these T-shirts are abrasion and friction resistant, and the flexible fit ensures ample freedom of movement and maximum comfort.

EXCEPTIONAL FREEDOM OF MOVEMENT

Seamless technology enables 360° action with no side seams, offering a great fit and maximum comfort

QUICK- DRYING

The use of U-DRY fibre ensures surprisingly quick drying

ABRASION RESISTANT

Extremely strong, it remains intact against abrasion and rubbing

SKIN TECH

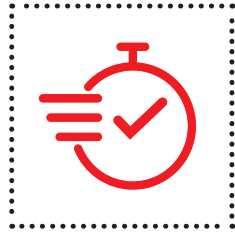

COMFORT AGAINST YOUR SKIN

THE EASY-TO-DRY UNDERWEAR
WITH THE LOWEST SPECIFIC WEIGHT
FOR LIGHT GARMENTS

SKIN TECH

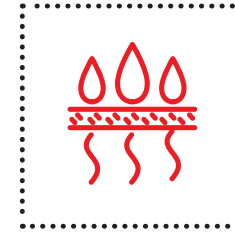

RELAXED FIT

This range, with a flexible comfortable fit, is made with seamless technology to ensure ample freedom of movement and exceptional comfort. The dual wicking layer in contact with the skin transports sweat to the outside, benefiting the muscles and body in general. It is made of a fibre with bacteriostatic properties that make it odour-free, even after prolonged and intense exercise. It is non-allergenic and able to withstand abrasion, friction and tears.

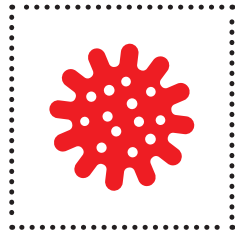

QUICK- DRYING

The use of U-DRY fibre
ensures surprisingly
quick drying

WICKS MOISTURE TO THE OUTSIDE
